Languages

Hindi

English

Passionate and self-driven Game Developer and Web Developer with hands-on experience in Unity, C#, React.js, and PHP. Skilled in designing engaging gameplay mechanics and building full-stack web applications. Participated in multiple game jams and hackathons, with a strong focus on problem-solving, learning, and rapid prototyping.

Education

BCA

LNMI / 08/2023 - Present

Patna

Pursuing BCA with a focus on programming, development, and problem-solving skills.

Projects

Don't Trust Me (Puzzle Game – Unity, C#)

A 2D puzzle game with deceptive mechanics where in-game actions behave opposite to expectations. Includes interactive level selection and custom level design.

[View Project](#)

Stellar Vortex (Top-Down Space Shooter – Unity, C#)

Fast-paced 2D space shooter featuring enemy AI, power-ups, scoring system, and fluid player controls. [View Project](#)

Useless Surf (HTML, CSS, JavaScript)

Useless Surf is a fun, interactive website designed to entertain users with endless scrolling, card flip games, maze challenges, and other quirky, pointless activities. With a simple click of a button, users are redirected to a world of amusing distractions and delightful chaos. Perfect for a quick escape from the everyday!

[View Project](#)

AI Text Generator (React.js, Tailwind CSS, Gemini API)

AI-powered tool for generating creative content using Google Gemini API. Features a clean and responsive UI. [View Project](#)

Game Jams

- **Brackeys Game Jam 2025.1** – Built a playable prototype under time constraints.
- **GameEon Studios Unity Jam 2024**
- **Nikhil Malankar Infinity Game Jam**

Hackathons

- **PWC Virsat – Smart Patna Hackathon**
Developed a prototype for Smart City initiatives focused on urban solutions.
- **Amity University HackIT**
Contributed to a team project tackling real-world tech challenges (details optional).
- **Amity University Social Media Design Challenge**
Designed a creative social media platform UI and concept.
